Company Profile

Welcome To Mediinfotec

MEDI-INFOTEC is a company formed by doctors who realized that the Medical Profession requires specialized software. These doctors who left their medical profession started this company to satisfy the software demands of the doctors. As we understood that the requirements of doctors are different from those of other fields, we dedicated ourselves only in the development and marketing of Medical Management Software. Established in 1994, in Chennai, Medi-infotec has grown swiftly to an IT solutions provider.

MEDI-INFOTEC is Health Information Technology (IT) consultant and services provider, offering Hospitals flexible delivery capabilities. Medi-infotec advises clients on strategic business and technology plans as well as develops and implements appropriate IT application solutions, thus helping them to gain competitive advantage in their highly competitive business areas.

MEDI-INFOTEC's versatile end-to-end service capabilities include: Business Consulting, Browser based development systems in various platforms like JAVA, .NET etc .

As a progressive medical software company, we take pride in working consistently with our health care clients to deliver packages based on their unique situation and practice requirements. This equals making their business more efficient where they can expect measurable improvements in customer satisfaction and market share.

In a world full of medical software applications we choose to be different and original in our approach. We are proud to say our software is an integration of new ideas, most of them originating as valuable suggestions from our existing customers.

Our Vision

"To become the leading medical informatics company in the world by continuously creating innovative products, cementing strong relationships with customers and empowering our employees to excel at all levels".

Product Features

✔ Appointment Scheduling

The appointments of the doctor and other para-medical staff like the physiotherapist and dietitian can be managed with this module. Appointments can be advanced, postponed depending on the availability of the time slots. Provision to adjust the time slot for the appointment depending on the pattern of the consultant is available.

✔ Out Patient Management

✔ Registration

Registration captures all the patient identifying information, contact and billing details, source of referral to the hospital under a unique Patient ID that remains constant. The details captured here do not need to be re-entered at any level and show up at every relevant screen related to the patient.

✔ Pre Registration / Self Registration

New Patient can enter their details in terminals that are available in the hospital to facilitate their registration entries faster.

A follow up or review patient can do a self registration by entering their ID and Date of birth to facilitate minimizing his waiting time.

✔ Out Patient Billing

Billing happens differentiating the patient as Self, corporate and Insurance patients. Different tariff for the services depending on the company can be set.

✔ Settlements

✔ Batch Process

The settlement of the out patients happen in batches. The bills generated are clubbed together as batches and the bill details are sent to the company for the receipt of payment.

Product Features

✔ Settlement

The payments received in batches are captured. If one or more bills are not paid for any reason by the company, this module tracks it down and sends

✔ OT Scheduling

This module facilitates the theatre management. Multiple theatre option with marking the theatre for any specialization or general surgery can be done. The theatre scheduling is colour coded.
